Here is what to expect, how to watch for it, and what you can do to prepare yourself.

This special report is indispensable for understanding the tremendous changes which are underway in the world today. The changes for the next four years are laid out for the economy, jobs, career, real estate, stocks, currency, government, the war on terrorism, Iraq, politics, and much more. Here is perspective for these uncertain times.

READ THIS REPORT IMMEDIATELY before doing anything with any of these topics, so you can chart your immediate future with confidence during these tumultuous times.

What to do? How do you respond personally, socially, and politically? Drawing upon his insights garnered from a 30 years of study of history, politics, economics, business and trade, Mandeville covers all the bases to reveal the most probable economic and political futures through to 2008. Mandeville paints a masterful, easy to read vision of economic and political change for the next several years which easily surpasses anything which has been put in print. The author begins with Edgar Cayce's amazingly accurate clairvoyant description of a "25 year Economic Depression Cycle" which will return in 2006 and 2007. He describes the depression "wall" which everyone in the World will hit and then explains the strategies which any person can use to survive the collapse and position themselves for greater growth in the future.
