

## Earth Changes Bulletin Update As Of August 13 2003 Page 1

### Earth Changes Bulletin Update As Of August 13 2003

You have heard of the Weather Report? Here exclusively is this week's "Earth Report" - a short review of the "big picture" about how the dynamic changes in the Sun and the Earth are effecting our lives more and more intensely, with the latest prognostications and predictions for weathermen, farmers, investors, businessmen, and every man.

This update is keyed to the Earth Changes 2003 Almanac Calendar. The framework for understanding these updates and much of the current status information is maintained in capsule form in the Almanac at the locations cited in the text of this Update.

On the geophysical front, quakes were QUITE subdued, CONTRARIAN TO THE SYZYGY WINDOW. Volcanoes were down slightly, The Earth's July shape-shifting appears to be mainly over, but a 6.0 and a 4.5 struck the edges of the Antarctic Plate at widely separated locations. The Sun at the moment is fairly subdued with sunspots at 114. They did not rise as expected during last week but they did not fall by much and they should start moving up this next seven days. All predictions stand, NO SIGN YET OF A NORMAL AUGUST on any front and most likely sunspots are headed back up, to peak finally about August 25 most likely over 200. For Europe, the heat will continue, then break in September and be followed by immense rains and floods.

On the geopolitical front, LITTLE CHANGE DURING THESE DOG DAYS OF SUMMER. ALL CONDITIONS CONTINUE TO DECAY INTO INCREASING DISORDER. A culture of mass deception and denial in America continues to sow and reap fragmentation and increasing opposition. Expects in many fields are beginning to crawl out of government and corporate cubby holes and document the lying ways of the Imperial Faction in a number of fields, ranging from economics to environmental affairs. In the not-so-old days, nobody ever got it all together (the machinations of the elites) but it appears that it will all come together on the iway. My, my, isn't THAT interesting, says the Church Lady. At the moment the media is successfully distracting everyone with a three ring circus of tragi-comedy acts composed of Kobe Bryant, the Terminator, and the hunt for Saddam, or Osama, or anybody with any connection to terrorism whatever. Meanwhile the GIANT SUCKING SOUND is getting louder and louder as the corporations systematically loot what is left of America and the incompetent managers of the Imperial Faction progressively "lose" Iraq and the loyalty of the American military.

---

### *Program Thesis: What are we trying to do with the Earth Changes Bulletin?*

Most news media do not handle technical and scientific subjects like geology and earth sciences very well. They don't understand the causes and effects of activities in the Sun and Earth. Accordingly, they often do not understand if, when, how, why to report earthquakes, volcanic activity, global warming effects. The treatment often sounds absent-minded, poorly qualified, and frequently contains various technical errors. Seldom is the treatment entertaining and genuinely educational.

Based on new scientific principles which have emerged during the past thirty years, many of the dynamic activities of the Sun and Earth can be linked together to see how a range of effects are linked together. This makes it possible to paint "the big picture" into a perspective which explains many diverse events and processes, especially climate and weather patterns such as global warming and El Nino. From the "big picture", long range predictions can be made for weeks and even months ahead.

The result is sophisticated cutting-edge information which is objective, balanced, astute, relevant, and can be easily seen and appreciated by lay audiences. The perspective is generally global, seldom parochial. For the framework of concepts, terms, and current conditions which are used or described in the these Bulletins, see the Earth Changes 2003 Almanac Calendar.

To see the internet resources which are used to prepare this Update, take a look at the Earth Monitor front page  
<http://www.michaelmandeville.com/earthmonitor>.

If the material does not require a password, the material is available for free and it may be freely copied on the internet.

---

## **HOUSEKEEPING:**

RE: THE COMING ECONOMIC COLLAPSE OF 2006, which puts today, tomorrow, and the trends together into the Cayce 25 year economic cycle which will "bottom" in 2006/2007.

**PAM WISEMAN DID ANOTHER PROOF EDIT THE LAST TWO DAYS ON THE COPY FROM THE PRINTER'S PROOF VERSION.** The copy has been corrected in the ebook version to fix about three dozen typos, glitches and missing words. It will be posted about midnight August 13.

**SO, THE FINAL FINAL EBOOK CAN BE DOWNLOADED FROM**  
<http://www.michaelmandeville.com/calendar/collapse2006>

I am in SNOWFLAKE Arizona FOR AUGUST. I AM SLOWLY CATCHING UP WITH EVERYBODY. There are lots of messages which I intend to respond to so if you have not heard from me after writing serious questions, hang on for up to another week.

I WILL HAVE DAILY OR SO ACCESS TO THE IWAY

All outgoing mail will be sent from: "Michael" or "Inspirit"  
<inlighthardman@cybertrails.com>

**PLEASE DO NOT USE AUTO REPLY** if you respond to messages with this email address on it. All such messages will go to an email box to which I do not have access.  
**Instead, MAKE SURE YOU TYPE IN MY BASIC EMAIL ADDRESS, WHICH IS:**

[mwman@earthlink.net](mailto:mwman@earthlink.net)

**As reported:** People are beginning to ask again about Arizona and Safe Havens projects. I will do some special posts on this in August.

## **SPIRITUAL WATCH – AS OBSERVED LAST WEEK**

The high sunspot peaks are excellent for meditation and expanding one's consciousness of the spiritual energies. Past peaks brought forth amazing energy and power into the lives of meditators, psychic attuners, and spiritually active healing practitioners.

TALK ABOUT A LOT OF MOOD, INTELLECTUAL, AND POLITICAL SHIFTS. WOW. Has anyone escaped the buzzsaw whiplash? I have had some of the hardest times completing my meditations this past week than I have had for the past two years at least. I have found focus is really hard to find and maintain. I can hardly complete a paragraph without a bunch of errors. Security and fear is higher than it has been in North America since I am not sure when.

Dark prophecy abounds everywhere while stark raving lunatics brazenly recycle with minor changes their failed intellectual garbage and prophet scams for another around.

At least some astrological based predictions see an intense period of calamitous stress and change during September 9 through 12. I cannot evaluate this so I won't, I merely pass along the dates to you and the URL. See below under ASTROLOGY ANALYSIS

Meanwhile "Nibiru" is now being reinterpreted as a planet in some other dimension which is marauding us "this" time around from an invisible dimension. Will Central Casting please pull this act off the stage before somebody gets hurt by these clowns.

AS REPORTED LAST TWO WEEKS: Have you not noticed as prominently advertised here that a lot of people ARE going crazy and that gratuitous violence and terminal weirdness are evident all around with high sunspot counts? Need I name names or point to specific events? Central Casting has been so thrilled at audience participation on Earth and general response to cosmic sunspot choreography that a special offer is now available to subscribers of the Earth Changes Bulletin.

THEREFORE, AS RECOMMENDED LAST WEEK: MEDITATE OFTEN AND RE-CENTER YOUR ENERGY ON LOVE AND GIVING IT. Central Casting will shield out the backlash, cancel out all NEGGIES, THE DOG DAYS, STORIES ABOUT THE EMPIRE STRIKES BACK, ALL FORMS OF VIOLENCE AND WEIRDNESS AND ETC.

Such a deal! A meditation a day lets it all go. For especially powerful meditations, high highs (really) without drugs, you will have another chance leading up to the August 27 alignment of Earth with Mars. If you are not already meditating on a regular basis with a regular regime, take advantage of this next cycle to connect with new people in a wonderful way and to blow a lot of clinkers out of your being and headspace.

For more info: see  
<http://www.michaelmandeville.com/quest>

### **ASTROLOGY ANALYSIS**

**I DO NOT INTEND THIS AS A REGULAR FEATURE BECAUSE FRANKLY I SELDOM CAN MAKE ANY SENSE ABOUT WHAT TO DO WITH THE WORDS ASTROLOGERS BREATHE AT ME BUT BECAUSE OF THE HIGHLY SPECIFIC DATES FOR THE CENTERING OF DIFFICULTIES, I AM PASSING THIS TO YOU AS A WATCH AND SEE EXPERIMENT.**

Astro Cartography Prediction

Astro Trading?

<http://www.urbansurvival.com/week.htm>

I received an interesting set of predictions about future events from a reader yesterday, who was kind enough to give me an interesting approach to astrology. Unlike Arch Crawford - and others of the astro-econ school, this reader's work focuses on applying heavenly transits directly to the earth's surface. The email will fill you in...

## Earth Changes Bulletin Update As Of August 13 2003 Page 4

Just wanted to give you a heads up with my work. I mentioned in the past seeing the bots correlate with my work. It may prove interesting for you to see the work before the next bot run.

The body of the work is Astro Cartography maps....ACG maps give the travel path of the planets over the Earth....or...as above so below.

The technique I have been developing has shown to be highly effective with its predictive expectations for event and place.

The best way to describe the work....

"A moment in time where time does not exist....waiting for a trigger"

On 9/7/03 Mars is opposite Jupiter....this signals a large violent event.

The ACG maps at the time of the opposition are ominous for one US location.

Jupiter MC {large, exaggerated}...Mars IC {war,violence} .Uranus IC {sudden, unexpected, quake trigger} with an intersection of the South Node {expression of negative karma}..... all converge from San Diego to Las Vegas .

The Las Vegas intersections are very disturbing. However the path to the West to San Diego can not be ignored.

The map sets on 9/7/03 but here is the kicker. With the work I am always looking for what can trigger this moment in time that has the stored energy.....the lighting of the fuse if you will. I didn't have to look far.

On 9/9/03

Moon conjunct Uranus

With selected maps this trigger has proved reliable for calling quake time and location. Its the trigger I used with the Uranus station of last Fall to call the Nebraska quake two weeks in advance. That call got some attention....lol.

9/9/03

Moon conjunct Mars

Violence, war like action, confrontation

9/9/03

Moon opposite Jupiter

Rebellion or opposition in regard to religious matters.

All of this with the node intersection calling for the release of negative karma.....Yikes!!

But there is more. On 8/29/03 Jupiter is opposite Uranus. There is only one way to describe this. It is a massive explosive release of energy.....very unpredictable. No one worth his salt would dare call this event....this one will always catch you with your guard down.

It encompasses....massive Earth movement.....explosive unpredictable behavior.

The day before on 8/28/03 Pluto stations direct. Pluto is the lord of the underworld...Phoenix rising. This just boggles the mind.....it is almost beyond comprehension.

Map locations for Jupiter, Uranus, Pluto map release of energy. Draw a line from Norway down to Germany into the Balkans. Continue the Jupiter Uranus lines down through Egypt, Sudan, Tanzania....continuing South East.

The Pluto IC travels on a North South line traveling South from Russia to the Turkey Iran boarder, down into Iraq, Saudi Arabia and Somalia. Now what makes this so disturbing with the observations above is that on the Full Moon of 9/10/03 the Full Moon squares the Pluto location on the Pluto station direct map. I don't have words to describe the energy that is showing to be released. This line could be showing an 8+ quake or equivalent energy release. I am in absolute awe.

To top it all off Eastern China and North Korea are also highlighted on the maps for energy release.

These future maps are breathtaking for their implications

Respectfully Yours

Now, if we get a largish earthquake in that area from Vegas to San Diego and it's +/- a day or two, I will have to give this guy a gold star for an innovative use of technique. Moreover, if we see some lining up with James Berkland's work at <http://www.syzygyjob.com/>, I'll become a bit nervous. Having a trip to L.A. on the books this fall, I have to remember to make travel plans for a low rise hotel...

### **POLAR MOTION**

What is happening to the motion of the Earth. For the overall summary of the status of polar motion GO TO:

<http://michaelmandeville.com/earthmonitor/ecbulletins/statusreports.htm#polarmotion>

(watch the word wrap on the URL)

To see the current graph of polar motion, see

[http://www.michaelmandeville.com/earthmonitor/topten\\_monitor.htm](http://www.michaelmandeville.com/earthmonitor/topten_monitor.htm)

Scroll down the page until you get to the black and white graphs with show the x and y coordinates of the North Spin Axis on two separate graphs.

Once again, no change from last week. Steady as she goes. As previously reported, a slow acceleration in the shifting of the poles has been underway for perhaps the past 100 years and the last three decades has shown an increase in the rate of acceleration.

The "rut" behavior of the past month or so is now disappearing. The spiral track is moving unto new ground and it is beginning to widen out the spiral. Possibly, the recent "rut" track (in which the spin axis was running over a previous spiral track from the year before) was more or less just a "dent" from which the spiral track is now recovering.

### **MAGNETIC POLES – SHIFTING**

What is happening to the magnetic fields of the Earth. For the overall summary of the status of the changes in the magnetic field GO TO:

<http://michaelmandeville.com/earthmonitor/ecbulletins/statusreports.htm#earthfield>

(watch the word wrap on the URL)

No news since last report: a slow acceleration of the rate of drift towards the spin axis is underway.

## PLANETS

(all time coordinates here and elsewhere are in UTC unless otherwise noted)

For background and the current information on planetary alignments GO TO:

<http://michaelmandeville.com/earthmonitor/ecbulletins/statusreports.htm#planets>

(watch the word wrap on the URL)

See Earth Changes 2003 Almanac Calendar for additional details

<http://www.michaelmandeville.com/ebooks/calendar2003/>

The Almanac lays out the planets and the lunar phases for entire year in advance to allow you to find the best and worst periods of weather, earthquake activity, ethereal "lunar" influences, etc.

The Moon this day is deep in its South Node (South of the Earth's Equator) and we passed the Full Moon on August 12.

The next Lunar Apogee will be August 19 14:23 UTC some 404101 km distance from the Earth. (Perigee = the Moon's closest approach to the Earth during its monthly orbit which increases gravitational influence of the Moon by as much as 15%; Apogee = the Moon's greatest distance from the Earth during its monthly orbit).

The syzygy window for this Full Moon Period will continue on through tomorrow. Normally Berkland computes a syzygy window forecast for the full moon periods but at this late date he still has not done so. Jim Berkland has a more complex formula for syzygy and his dates are often different. For details see <http://www.syzygyjob.com/>

The next New Moon is August 27 at 17:26 UTC on the same day as the Mars | Earth alignment.

The next planetary alignment will be on August 18. A double header alignment will form between Earth | Mars | Neptune on one head and Venus | Jupiter on the other head. Since the orbital speeds of Mars and Earth are very similar (compared to the rest of the solar system), their alignment will be very close most of the month.

AS PREVIOUSLY REPORTED: The Earth | Mars alignment is August 27. At 5:51 a.m. EDT on Aug. 27, 2003, Mars will be within 34,646,418 miles (55,758,006 kilometers) of Earth. This will be the closest that Mars has come to our planet in nearly 60,000 years. For general background info on Mars and the approaching alignment, see [http://www.space.com/spacewatch/mars\\_preview\\_021108.html](http://www.space.com/spacewatch/mars_preview_021108.html) (watch the word wrap on this URL)

**CHECK OUT THE LINK ABOVE FOR BACKGROUND INFO ON THE APPROACHING EARTH | MARS ALIGNMENT. THIS IS A PROFOUNDLY IMPORTANT EVENT ON AUGUST 27, 2003 WHICH YOU SHOULD TUNE INTO. THE SUN IS GOING TO EMIT AN ENORMOUS AMOUNT OF ENERGY DURING THIS PERIOD AND THIS WILL PRODUCE AN ESCALATION IN VIOLENCE AND CHAOS IN HUMAN SOCIETY.**

## PLANET WATCHING:

For background and the current information on observable planets and planetary alignments GO TO:

<http://michaelmandeville.com/earthmonitor/ecbulletins/statusreports.htm#planets>

(watch the word wrap on the URL)

Simple hobby telescopes can now "tune in" the planet and see features on it, like Mars' polar ice cap.

IF YOU CAN GET A CLEAR NIGHT.

We are already passed the peak of the Perseids but tonight should be good viewing.

IF you can (we cannot) check out the **annual Perseid meteor showers tonight** for the old gipper here in the mountains of Arizona where the sky is usually clear and you can see forever and THE DAMN CLOUDS ARE SO THICK THE PAST 24 HOURS WE CAN'T SEE ANYTHING.

Why why, why, tonight do we finally get the monsoon up here on the plateau?

NASA posted a great story

[http://science.nasa.gov/headlines/y2003/17jul\\_perseids2003.htm](http://science.nasa.gov/headlines/y2003/17jul_perseids2003.htm)

which explains in depth the Perseid meteors, the Full Moon, and how to locate Mars on August 13. Go take you kids out of the city to watch because city glare ruins it. The higher the elevation the better and get at least 50 miles out into the boonies.

If you can't see it, you can try hearing it. "Spaceweather" has three sites where the visible traces are being digitally turned into audio signals. Fun and games even if its cloudy out. Go to: <http://www.spaceweather.com/>

**THEY SAY THE BEST TIME TO CATCH THE SHOWER IS IN THE EARLY MORNING HOURS, A COUPLE BEFORE SUNRISE.**

SEE THE ANCIENT DRAMA IN THE SKY IN THE EARLY EVENING TO MIDNIGHT SKY

(this is a repeat of posts made the last couple of weeks)

<http://michaelmandeville.com/earthmonitor/ecbulletins/statusreports.htm#ancient>

HOW TO FIND MARS:

<http://michaelmandeville.com/earthmonitor/ecbulletins/statusreports.htm#ancient>

**FOR A GREAT AMATEUR PIX OF MARS, SEE**

<http://www.spaceweather.com/swpod2003/13aug03/duToit1.jpg>

## **SUNSPOTS**

The events in the solar atmosphere which impact weather and climate patterns, the magnetic field and auroras, including forecasts for the week, month, and year ahead. For background information, go to:

<http://michaelmandeville.com/earthmonitor/ecbulletins/statusreports.htm#sunspots>

(watch the word wrap on the URL)

To follow the numbers below, view the Solar Cycle 23 Chart at

[http://www.michaelmandeville.com/earthmonitor/topten\\_monitor.htm](http://www.michaelmandeville.com/earthmonitor/topten_monitor.htm)

Jan Alvestad, whose charts and numbers and forecasts I rely upon to keep track of sunspot dynamics, is on vacation this week and the next two, so we have to use this little table below instead which comes from NOAA files at

<http://www.sec.noaa.gov/ftpdir/latest/DSD.txt>

As can be seen the sunspots peaked on August 6 at 155 and have been hovering between 107 and 121 this past several days. Yesterday, August 12, the count was at 114. I expect that it will peak next sometime between August 18 and August 24 for the August 27 Earth | Mars alignment.

**BAD PROJECTION:** It did not keep climbing as guesstimated. That means that the August 6 peak was 12 days early for the double header alignment.

Date	Radio Flux 10.7cm	SESC Sunspot Number
2003 08 06	129	155
2003 08 07	137	121
2003 08 08	133	111
2003 08 09	130	107
2003 08 10	131	112
2003 08 11	129	118
2003 08 12	123	114

**GOOD PROJECTION (WHICH WAS MADE IN EARLY JULY):** sunspot counts remain relatively high, **perhaps close to 100 on average**, slowly increasing for the Earth | Mars alignment. There will be at least three minor peaks between now and then. **SO FAR, NUMBERS ARE STAYING ABOVE 100 ALMOST ALL OF THE TIME AND WE HAVE HAD AT LEAST TWO PEAKS.**

**CONFIRMED:** The Earth's magnetic atmosphere is merging rapidly with Mars and this huge circuit in the solar system will draw out the heavy solar activity, sunspots, and emissions. I predict that we are going to see a distinctly "third" peak in Sunspot Cycle 23, produced by the high average counts of sunspots during July and August 2003.

**MONTHLY AVERAGES IN SOLAR CYCLE 23:** Over all, the sunspot average count (ISSN) for February was 46.4 and for March it rose to 61.5. The number for April was 60. May's average was 55. The average sunspot count (ISSN) for June, was 77.4 up nearly 50 percent over May. That is a highly significant deviation from the projected curve. (These numbers are reported by Jan Alvestad). **LIKELY NOW, BOTH JULY AND AUGUST WILL BE EVEN HIGHER.**

As of this moment, the Solar Wind Speed is a modestly brisk **597.4** km/s at this hour (about 2 PM, AZ time) AND it is pushing a heavy density of **5.3** protons/cm<sup>3</sup>. These momentary fluctuations continue to mean little during these times. Currently the Fluxgate Charts at the University of Alaska (which measures magnetic disturbances in the Earth's atmosphere) shows a fairly even keel in the Earth's atmospheric magnetic field during the past 24 hours.

To see the Fluxgate, go to  
<http://137.229.36.30/cgi-bin/magnetometer/plotstations.cgi?>  
(watch the word wrap on the URL )

**NASA PREDICTS: "AURORA OUTLOOK:** Earth is inside a high-speed solar wind stream flowing from a coronal hole on the sun. Sky watchers in Canada and northern US states should be alert for auroras, although they will be hard to see because of tonight's glaring full moon."

Aurora watching should be good for the remainder of the month.

The Sun remains highly charged and unstable.

NASA predicts low probability of solar flares and storms. Geomagnetic disturbances for the next 24 hours are rated at 45% probability, diminishing to about nothing during the next few days.

**EARTH WEATHER PREDICTION FOR THE NEXT SEVEN DAYS:**

**AS REPORTED, NO NORMAL MONSOON. ANYWHERE.**

and there won't be any until mid September, which is normally the time they stop.

**IN FACT, NO NORMAL WEATHER ANYWHERE ON EARTH.** ONCE AGAIN EVEN THE ARCTIC IS MELTING AND SOME PEOPLE ARE NOW FREAKING OUT ABOUT THE MELTING OF THE PERMAFROST ON WHICH THE ALASKA OIL PIPELINE RESTS. If the permafrost melts enough, they will have to shut down the oil flow, which will permit the oil companies to cry shortage and raise gas prices, probably above \$2.00/gallon for unleaded. Meanwhile, the nuclear power industry in Europe is demonstrating that there is no such thing as an independent source of energy. The hot solar-storm induced drought in Europe has dried up the rivers to such an extent that they cannot cool the reactors enough to maintain energy production. (Wait till late September when they get socked with the coming floods).

Already confirmed, August is an even bigger rockem and sockem solar month than July. The heat wave has even killed at least one soldier in Iraq the past few days and they are very lucky more have not died.

As it has been for the past several months, most weather predictions have been fairly well confirmed. This summer's unexpected increase in the average sunspot count has recreated conditions which produce record breaking weather. Currently western Eurasia is experiencing what the Southwest and many Pacific states in North America experienced last summer. Like Europe, Alaska, and British Columbia, the inland areas of the Pacific Northwest have also been extremely hot, dry, recreating a mini drought pattern which is unusual for these area. Huge forest fires which are currently underway have been the dramatic result of the humid weather which sheds little rain but provides thunder and lightning to ignite the forests.

**AS PREDICTED LAST WEEK: SORRY, THERE IS NO RELIEF IN STORE FOR THESE PATTERNS. THEY WILL TEND TO PERSIST UNTIL THE MIDDLE OF SEPTEMBER. I ALSO SUSPECT THAT THERE WILL BE A LONG "INDIAN SUMMER" AS THE EARTH WORKS TO SHED ITS EXCESS ENERGY CHARGE.**

AS PREDICTED LAST WEEK: Definitely by about the 12<sup>th</sup> of August, the Full Moon, things should be getting highly energized. From that point on everything will continue to be experienced as "off" kilter and then EXPECT EXTREME CONDITIONS for the remainder of August, STRANGE, UNPREDICTABLE, DESTRUCTIVE WEATHER PATTERNS EVERYWHERE. The Earth's atmosphere will once again become HUGELY OVERBURDENED WITH ENERGY, DUST, WATER VAPOR, AND IONIC INFLUX. Huge dust storms will be reported forming up once again on Mars. It may even rain or snow slightly in the polar zones of Mars from water vapor transported all the way from Earth by the solar wind.

#### **GLOBAL DROUGHT AND FLOOD WATCH**

Stories and assessments about drought and flood conditions around the world; global information which provides the ability to assess the impacts to agriculture and the natural environment. For additional details, see <http://www.michaelmandeville.com/ebooks/calendar2003>

AS PREVIOUSLY REPORTED: Ethiopia, East Africa, and Northern India are in dire straits. Severe damage is destroying the eco-system and the human cultures. Nothing here is likely to improve during the next four months.

### **SOUTHWEST CONDITIONS: NOT GOOD**

for background or more details see

<http://michaelmandeville.com/earthmonitor/ecbulletins/statusreports.htm/#weather>

(watch the word wrap on the URL)

For August, close to NO MONSOON AT ALL IN THE PACIFIC SOUTHWEST. Relief has been scattered and total rainfall in the best areas has only been at a third the rate of normal years. Many areas still have seen no more than a few tenths of an inch of night drops.

Even so, I am happy to report that the Snowflake area is sporting weather conditions which are far more comfortable than on the Sonoran plain. Night time temperatures are below 60, allowing a complete cool down from the daytime highs of about 100. "Cool" summers are widely advertised for the White Mountains area and they appear to be right (and of course it's all relative, what is cool here is a record breaking scorcher in England).

### **EUROPE CONDITIONS**

Conditions in Europe have been extremely adverse in many areas. Since these have been so well reported in normal media I will not repeat them here. Adverse conditions will continue throughout Europe and this difficult summer may culminate in major floods during September.

### **EL NINO & LA NINA WATCH**

watch is closed, all Pacific water activity is normal, we are between the extremes of the ENSO

### **CHEMTRAILS**

For information, go to:

<http://michaelmandeville.com/earthmonitor/ecbulletins/statusreports.htm#chemtrails>

(watch the word wrap on the URL)

### **EARTHQUAKES**

Around the world to see the current and potential patterns of seismic activity, with coverage of the windows of danger. I prepared this section by pulling out the Earth Changes 2003 Calendar which has everything plotted on it. You should too. Check out the Almanac as well, it discusses all of the windows for the year and even spotlights the two most dangerous windows. **Unless otherwise specified, all quake activity which is discussed is based on the USGS database charts and tables which list quake activity in excess of 2.0 and above.** FOR MORE QUAKE INFO RELATED TO SYZYGY WINDOWS, Jim Berkland calculates syzygy windows with considerably more sophistication than I do. See <http://syzygyjob.com>

This Full Moon Syzygy has been diminished definitely and substantially in both frequency and magnitude SO FAR. (We have another two days to go including today). There were only three quakes at 6.0 and the greatest number of quakes were on the 11th with only 17 quakes (above 2.5). This is a very limp set of numbers.

The largest number of quakes for the past seven days was on August 7, which had 21 quakes (above 2.5) almost all of which were in Europe, mostly France, Switzerland, and the Aegean Sea. This was the tectonic response to the Lunar Perigee on August 6th.

Since August 8, quake activity has been light and widely scattered throughout the world in all the usual zones. Quakes in the Scotia Sea (edge of the Antarctic Tectonic Plate) disappeared except for a 4.5 quake on the Full Moon and no new quakes were reported in the Arctic zone. But a 6.0 quake struck along the

Antarctic Plate edge where it is closest to Australia (the quake struck nearly in the middle between these two huge tectonic plates).

All in all it would seem that the Earth's "shape shifting event" of July and early August has come to a close and I suspect that quake activity will mute now, leaving the syzygy period high and dry with very little activity.

**AS REPORTED:** At the moment I have "no correlate" for this shape-shifting. I cannot relate it to any particular trigger. For additional information about the significance of the rift quakes in relationship to the shifting of the poles, see the Earth Changes Bulletin Update for July 23, 2003.

**CAYCE UPEHAVAL WATCH: AS MADE JULY 23:** SPECULATIVE PREDICTION FOR WATCHING AND LEARNING: AS A RESPONSE TO THE JULY/AUGUST SHAPESHIFTING EVENT, WITHIN NEXT TWO to 12 MONTHS VOLCANIC ACTIVITY IN ICELAND, JAN MAYAN, AND ALL VOLCANISM ASSOCIATED WITH THE CARIBBEAN TECTONIC PLATE, INCLUDING THE VOLCANOES IN CENTRAL MEXICO WILL SHOW A MAJOR INCREASE IN EMISSIONS AND ERUPTIVE BEHAVIORS.

#### **THE WEEK'S MOST SIGNIFICANT QUAKE**

The most significant quake, tectonically speaking, was the

Magnitude 6.0 WEST OF MACQUARIE ISLAND

2003 August 11 13:40:19 UTC

Preliminary Earthquake Report

[http://neic.usgs.gov/neis/bulletin/neic\\_xiba.html](http://neic.usgs.gov/neis/bulletin/neic_xiba.html) U.S. Geological Survey, National Earthquake Information Center

World Data Center for Seismology, Denver

Magnitude 6.0

Date-Time Monday, August 11, 2003 at 13:40:19 (UTC) - Coordinated Universal Time

Monday, August 11, 2003 at 11:40:19 PM local time at epicenter

Time of Earthquake in other Time Zones

Location 56.97S 147.44E

Depth 10.0 kilometers

Region WEST OF MACQUARIE ISLAND

Reference 775 km (480 miles) WSW of Macquarie Island, Australia

2145 km (1330 miles) S of Melbourne, Australia

2415 km (1500 miles) S of CANBERRA, Australia

Overall North American activity was mostly contrarian of the Syzygy Window Principle. Quake activity should have been up during the past seven days. The USGS charts (such charts show all quakes 1.0 and above) for the U.S. and Alaska show 371 quakes for the past seven days (down from last week's 381) with the USGS chart for California/Nevada showing 227 quakes in California/Nevada during the past seven days (down from last week's 246). The USGS Chart for the Pacific Northwest reveals 34 quakes (two week sum, down from 53 last week) widely scattered throughout mostly in the Puget Sound Basin and the Portland area. Hood was silent. The USGS chart for Long Valley Caldera (Area) showed a running total of 6 (down from 21 last week).

The center of the Western U.S. responded to the pull of the Full Moon. The Rocky Mountain Cordillera had 16 quakes scattered throughout Utah (up from only 13 last week). The USGS Chart of Yellowstone Caldera Area showed 30 microquakes during the last week (up from 16 last week).

**BAD CALL FROM LAST WEEK (SYZYGY WINDOWS BITES THE DUST):**  
Quakes definitely should pick up even more this coming week for the August 12 Full Moon.

### **VOLCANOES**

Around the world with the most interesting and relevant volcano stories; briefs on the likely eruptions as well as coverage of on-going activity. For information on current eruptions, see the Southwest Volcano Centre at:

<http://www.swvrc.org/erupt.htm>

or see "Breaking Volcano Eruption News" at

<http://www.volcanolive.com/volcanolive.html>

### **ARE THE VOLCANIC FIELDS RESPONDING TO THE EARTH'S SHAPE SHIFTING?**

**Not yet.** The Southwest Volcano Centre reports 36 volcanoes on the alert status list (down from 37 last week), 6 volcanoes on the restless list (same as last week), and 23 on the active eruption list (same as last week). During the last week volcanism seemed to have declined but the resumption of activity from the summit of Etna on August 11 suggests that an uptick may be coming. (Etna is one of the world's most active volcanoes and is sure to be in eruption mode during major upticks in Earth's overall activity)>

### **MOST ACTIVE VOLCANOES (& OTHER NEWS) THIS WEEK:**

13 August 2003 from Volcano Breaking News

at <http://www.volcanolive.com/volcanolive.html>

#### **Mt Etna Volcano (Italy)**

<http://www.volcanolive.com/etna.html>

Wednesday 13th August 2003

Summit eruptions have resumed at Mt Etna volcano. Magma has risen to the surface within the central conduit system of Etna which was indicated by a summit glow of lava at North East crater. The date of the new activity fell on 11 August, 195 days after the end of the last flank eruption. The new summit activity means that the newly rising magma has not bypassed the summit craters and produced a flank eruption, as had been feared by many. If the summit activity continues long enough, it might progressively increase and bring a return of lava fountains which are the most spectacular feature of Etna's eruptions. Southeast Crater has no inner pit, so if this crater resumes its activity it may be violent and destroy the unstable summit of its cone, or gradual, with Strombolian bursts, and lava outflow possibly from one of its side vents that were established in 2000-2001.

#### **New Undersea Volcano Discovered (Aleutian Islands)**

Tuesday 12th August 2003

Scientists have discovered and mapped the first confirmed undersea volcano in the Aleutian Islands.

The volcano rises more than 1,900 feet from the floor of Amchitka Pass and may be the next Aleutian island. The black lava rock reaches within 380 feet of the surface and supports a profusion of coral, invertebrates, fish and other sea life, say the biologists and geologists working on the project.

It's about one-third to one-half the height of its sister volcanoes above the surface on nearby Gareloi, Tanaga and Little Sitkin islands. It lies about 12 miles southeast of Semisopchnoi Island. A strong eruption with lots of lava could conceivably surge above the waves and create a new island. Aleut oral stories describe the emergence of Kasatochi Island west of Atka. Native elders across the region will be consulted regarding an appropriate name.

#### Yellowstone Volcano (USA)

44.43 N, 110.67 W, summit elevation 2805 m, calderas

<http://www.volcanolive.com/yellowstone.html>

Saturday 9th August 2003

Scientists plan to set up a temporary network of seismographs, Global Positioning System receivers and thermometers to monitor increasing hydrothermal activity in the Norris Geyser Basin and gauge the risk of a hydrothermal explosion. The goal of the Yellowstone Volcano Observatory is to pinpoint underground sources of hydrothermal steam and learn more about how seismic activity affects the basin.

Scientists do not expect a volcanic eruption. However, small hydrothermal explosions occur in the park almost every year. Usually they are not noticed until after the fact. The Norris Back Basin has been closed since July 23 due to the formation of new mud pots, changes in geyser activity and much higher ground temperatures, as hot as 200 degrees in some areas. Vegetation has been dying due to thermal activity and altered eruption intervals for several geysers. Increased steam discharge has been continuing, according to park officials. Hydrothermal activity has been increasing each year in the basin, but the increase in recent weeks has been especially rapid.

More on Yellowstone Volcano...

#### Carlsberg Ridge Volcano (Indian Ocean)

Friday 8th August 2003

Scientists have discovered a "smoking" volcano 3,000 metres below the surface of the Indian Ocean. Scientists on board the research vessel detected a huge, dark plume of water, 600 metres thick and over 30 kilometres wide, rising hundreds of metres above a lava-strewn valley on the Carlsberg ocean ridge. "Black smokers", often teeming with exotic lifeforms, are known to exist in the Pacific and Atlantic Oceans but their discovery in the Indian Ocean is very recent."

El Popo gave only a 7 puff day, only three more than last Wednesday. Centrapred reports for August 13 (16:00 GMT) that "In the last 24 hours the monitoring system of Popocatepétl volcano recorded only 7 low intensity exhalations, accompanied by steam and gas. The other monitored parameters remain without important changes. This morning we could observe the volcano with low fumarolic activity. At the moment of this report there is no visibility due to the clouds."

#### **ECONOMIC WATCH**

For background information, use password to go to:

<http://michaelmandeville.com/ebooks/statusreports/statusreports.htm#economics>

(watch the word wrap on the URL)

**THE LATEST IMPERIAL FACTION BIG LIE:** The recession ended in late 2001 and the poor economic response since then is just part of a slow recovery from the terrorist attack. **FACT:** stock markets recovered their values within about 120 days at most after 911 and at all times prior in American history, the military responses to overseas threats enlivened the economy during the year or two after the response was mounted. In today's world, stimulation by the U.S.

government flows into China, which last year sported a record breaking rate of growth, some 7% (as I recall from journalistic sources without double-checking today).

THESE KINDS OF LYING WAYS ARE BEGINNING TO BE FRANKLY DISCUSSED THROUGHOUT THE MEDIA. SCIENTISTS AND TECHNICAL EXPERTS ARE BEGINNING TO BE HEARD IN A VARIETY OF FIELDS THAT BUSH AND CO. MANIPULATE FACTS INTO SUCH FALSE "IMPRESSIONS" THEY SHOULD BE RECOGNIZED FOR WHAT THEY ARE: ORWELLIAN BIG LIES.

THE SIXTEEN WORDS ABOUT IRAQ ARE JUST THE TIP OF THE ICEBERG.

#### FORECAST THIS WEEK

<http://michaelmandeville.com/ebooks/statusreports/statusreports.htm#forecastweek>

(watch the word wrap on the URL)

The Ditech Arbitrageur: no check this week (I am not seeing much TV)

AS REPORTED: APPARENTLY THE GIANT SUCKING SOUND IN THE ECONOMY IS PICKING UP SPEED AS THE PASS THROUGH OF WAR DOLLARS CHANNELS FROM THE PENTAGON TO THE BIG GLOBAL (ONCE UPON A TIME AMERICAN BUT NOT ANY MORE) CORPORATIONS TO THEIR NEW EMPLOYEES IN CHINA AND INDIA.

#### GENERAL PREDICTION DJI AVERAGES:

for detailed predictions, use password to go to:

<http://michaelmandeville.com/ebooks/statusreports/statusreports.htm#stocks>

(watch the word wrap on the URL)

ABOUT THE SAME. LITTLE CHANGE.

Over all, I believe that the Bear position is more soundly based in today's facts and this position seems to be "closing ranks". At this point in history, the Bull position is primarily loudest in the financial industry, esp. among New York's collection of "turn over artists", who make their money on turnover of sales. I believe now that there may not be much of an uptick in the economy at all as we coast and then slide into the Bottom of 2006.

– WATCH THE AUGUST BLOWOUT

#### EURO WATCH

for detailed predictions, use password to go to:

<http://michaelmandeville.com/ebooks/statusreports/statusreports.htm#euro>

(watch the word wrap on the URL)

this week one euro = US \$0.884

almost exactly the same as last week

AS REPORTED LAST WEEK: The dollar has firmed. Now may be the time to buy. August is going to be a month of a lot of people making emotional decisions and minding the store as little as possible. For discussions and predictions, go to the URL above

or, MUST READ: "The Dollar Panics" in "The Coming Economic Collapse of 2006", which lays out the dynamics of what is happening.

see <http://www.michaelmandeville.com/calendar/collapse2006.htm>

NOW IS THE TIME TO CONVERT SIZABLE UNUSED LIQUID ASSETS INTO THE EURO OR CHEAP GOLD.

### **JOB WATCH**

AS REPORTED LAST MONTH: Oh, its grim, unless you are being stimulated in China by the giant sucking sound in the American economy which is bleeding jobs into China at a faster and faster rate. Unemployment at the end of June stood at a ten year high of 6.4%.

The Imperial Faction has just wiped out ALL the gains of the Clinton Feelgood Years. Meanwhile, American corporations have made many announcements this past 30 days about job shifts overseas. The corporate executive "rats" are steadily deserting the American ship of state. It is high time the conversation shifted from "being a victim" of economic change towards, "look at the rats deserting ship and the legions of executives who are betraying their community trust in the American nation". At some point, Americans will be forced to declare that many corporations are no longer "American" corporations but have become "foreign" intrusions.

The job situation will probably remain bleak throughout this year unless you have a clean background and are willing to work for less than \$10/hr. in the burgeoning security industry or for \$7.00 at Wallie World.

UNKNOWN SECRET FACT: Northern Arizona and New Mexico have not suffered much of the recession and continue to expand economically. The economy is driven by people moving in to retire to escape the urban war zones. Good location for contractors, builders, wood products, and new wave or new paradigm shops, health, etc. Inquire of the Quest family.

### **HEALTH WATCH**

– No new status-changing alerts

### **GEO-POLITICAL WATCH**

How are the sunspots likely to most effect human affairs during the weeks and months ahead?

SIGN OF THE TIMES: it looks like, America's hot adventure "reality" show, "The Empire Strikes Back" HAS successfully keep much of the corporate scandals under the rug. Ken Lay, just a good ole boy Texan, the Presiding Officer of the rape of California Consumers, otherwise known as Enron, is still scott free with his crooked billions...LOU DOBBS' scoreboard: After nearly two years, 57 indicted crooks, 16 of them from Enron, **2 indicted crooks** are now in jail, none of them is Ken Lay.

For more SIGNS OF THE TIMES: see

[http://www.michaelmandeville.com/earthmonitor/ecbulletins/statusreports\\_political.htm#SIGNS](http://www.michaelmandeville.com/earthmonitor/ecbulletins/statusreports_political.htm#SIGNS)  
(watch the word wrap on the URL)

AS PREVIOUSLY WARNED: WATCH MID to LATE AUGUST. Various intuitive impressions are flowing from many sources about August and the Earth | Mars alignment. This may be related to Palestine, it may be related to something else.

THE STRATEGIC SITUATION:

For predictions related to the mess in Palestine, the Middle East, and the Bush political era, check out [http://www.michaelmandeville.com/earthmonitor/ecbulletins/statusreports\\_political.htm#strategic](http://www.michaelmandeville.com/earthmonitor/ecbulletins/statusreports_political.htm#strategic)  
(watch the word wrap on the URL)

George Bush is strictly a one-term President and it is the wreck of the economy and government agencies and programs which will drive him out of office. PREDICTION: Veterans will play a major role in driving Bush out of office. So will truckers and the Teamsters unions, for a multitude of reasons. Large numbers of Veterans are really angry about Bush's lying and the thieving ways of his cronies.

AS OBSERVED LAST FEW WEEKS: We still are in the dog days, more or less, high summer where everything muddles in the muddle its in without much change. This will continue into August and then I suspect that a new round of terrorist activities will stir up a roiling boiling pot of violence and confusion.

ALL BELOW, REPEAT FROM LAST WEEK:

At the moment all we can do is wait for distractions as we pish around the Summer muddle waiting on the one hand for Al Qaeda's next round of assaults in the vast world guerilla war which is progressively unfolding around us. On the other hand we wait for the press shark packs to draw blood on the Imperial Faction while wondering if the economy really is as fatal as most of the pessimists claim.

The Sorcerers who control the Mass Hysteria Broadcast Media are taking maximum advantage of fortuitous events to change all subjects and discussions. No sooner did the hounds begin to encircle the White House over its lying ways, great portions of the mass broadcast media have diverted resources, reporters and air time to Kobe Bryant's totally irrelevant cheating backfire and to an imaginary "epic political struggle" between Republicans and Democrats over the future of California.

The next 60 days of this "recall" election will provide a media circus of phony issues, personality collisions, political and economic illusions, as well as a vast theatre in which all of the "structural problems" and the giant sucking sounds in the American economy will provide a surround sound and image panoply of the collapse of the American economic and political system. Loss of industry, diminished high tech companies, large numbers of unemployed people at all levels, massive imports from China pouring through the docks, falling tax revenues, government on the dole at all levels trying in skimpy, nearly incompetent ways to provide basic services to huge numbers of illegal immigrants, a large number of groups leafleting about practically everything, liberal and democratic politicians stumbling (while in sleepy denial) over the impossible population mix and untenable government budgets created by the flood of illegals, ghosts of Perot and Buchanan raising the flags of nativism which are becoming more and more convincing under the sheer impact of the magnitude of the problems, populists and both radical left and right demanding a whole new world, Grey Davis and other faux-centrist politicians in serious need of political viagra, Keystone Cops party politics among all clans of the Republicrats, right wing nuts sounding rap mantras for the new globalist revolution of total freedom for the ultra-rich, a parade of opportunistic luney-tune media personalities running for governor, and then, of course, there is Arnold, running as the Terminator of a failing political system.

In this 60 day recall spectacle, Grey Davis represents all the faux-centrist democratic partisans who have hand delivered the American population into the current socio-economic collapse by spending the last twenty years undermining the New Deal coalition with increasingly slavish devotion to monied special

interest politics at the expense of the common good. Look, Massah, we good Republicrats and we ain't looking back at those fools on the bottom.

Shed no tears whether Grey wins or loses. California is merely the first victim of the failed policies of the past 20 years. Its very size and previous accelerated success has brought all the contradictions and gross absurdities of America together to mix in hugely large impossibilities within its borders. Davis is no more a failed Governor than any other. The simple truth is, California is collectively in deep arrears and is managed by a crazy culture of stupid white men who no longer have a valid connection to the real world and have not a clue how to re-acquire real connections to the real world.

In essence, the California crisis demonstrates the bankrupt policies of the national corporate elite which has imposed a one-sided, greedy grubbing globalism on the U.S. California's recession is China's growth curve. It is that simple. In this respect, as goes California, so goes the U.S.

The only way out is a profoundly pugnacious politics which grabs the wealthy controllers of the corporations by the nuts, squeezes real hard, throws them up against the wall, and shows them the New American Deal. More probable than not, it will take another four years of escalating failures before enough illusions about wealth and greed are shed sufficiently to permit Americans to throw out the fat ass lawyer class and use their individual brains once again to create real solutions.

In the meanwhile, it may be highly instructive to observe how the Terminator plays in California politics. But before then, **head for the hills or the beaches and forget this crazy world until you have to get the kids back in school.**
